

allow users to
time/upload practice
purpose! sessions documenting
their progress

Input: User says, 'I'm practicing' →
timer starts, they can write
down what they do during the
session

or
User says 'I just practiced' →
input time spent and summary/
items

Processing: Session saved to a database
in the user's account

Output: user's session is 'posted' to
a feed, visible to anyone on the
main page. User can view
previous sessions + total time.
